Memorandum

*October 22, 2009
Agenda Item 6.3.2*

DATE: October 13, 2009
TO: CMA Board
FROM: Plans and Programs Committee
RE: Draft Alameda County 2010 STIP Proposal

Action Requested

It is recommended the Board approve the Draft Alameda County 2010 STIP Proposal. A Final Alameda County 2010 STIP Proposal is scheduled to be considered at the December 3, 2009 CMA Board meeting. The Draft Alameda County 2010 STIP Proposal is comprised of the current 2008 STIP programming plus the proposed 2010 STIP programming shown in the attached Table 1 and Table 2.

Discussion

Each STIP cycle, the California Transportation Commission (CTC) adopts a Fund Estimate (FE) that serves as the basis for financially constraining STIP proposals from counties and regions. The CTC reviewed the Draft 2010 FE at their September 2009 meeting and is expected to adopt the Final FE at their October 2009 meeting. It is anticipated that the Final FE adopted will be similar to the Draft FE in that the impact on the 2010 STIP will be no additional programming capacity beyond the current 2008 STIP with the exception of capacity for Transportation Enhancement (TE) projects and Planning, Programming and Monitoring (PPM). The CTC staff have also indicated that from 30 – 40% of capacity currently programmed in the current year and in fiscal years 2010/11 and 2011/12 will need to be shifted to later years. MTC has indicated that Alameda County's share of the new TE capacity will be \$2.629 million. The CMA expects to program approximately \$5.469 million of TE in the 2010 STIP programming process.

Table 1 shows the currently programmed 2008 STIP projects which may be subject to the shifting mentioned above. Project sponsors should review any STIP funds programmed in the current STIP and consider the possibility that the funding may be shifted to a later year. The CTC has not provided limits for each county by fiscal year. The necessary adjustments will be rolled up to the statewide level. Given the recent economic constraints, it is anticipated that some number of projects Statewide will be shifted due to impacts on the timing of the availability of other sources of project funding.

Notwithstanding the potential impacts on the timing of the current 2008 STIP programming, the Draft Alameda County 2010 STIP Proposal is focused on the programming of the proposed TE capacity of \$5.469 million. Table 1 shows the current TE Reserve and the commitments

included in the current reserve. Table 2 shows the PPM and TE eligible candidate projects submitted by project sponsors in response to the call for STIP project information.

The CMA has committed to fund several projects through the STIP in resolutions 08-006 Revised and 08-018. Projects detailed in these resolutions include: Caldecott Tunnel, BART Warm Springs Extension, AC Transit Bus Rapid Transit (BRT), Dumbarton Rail Project, Backfill for Lifeline Program Funds, Mission/880 Project, Broadway/Jackson Interchange Project, and 880 Corridor Improvements. These projects were reviewed for eligibility for the available TE funding. None of the projects have TE eligible components that could be included in the Draft Alameda County 2010 STIP Proposal.

The candidate projects shown in Table 2 are segregated into three groups: Group 1 contains PPM funding; Group 2 consists of TE-Eligible projects ready for construction phase funding; and Group 3 consists of TE-Eligible projects requesting funding for pre-construction phases.

The following priorities are recommended for the 2010 STIP Proposal:

1. Currently programmed projects included in the 2008 STIP, including the TE Reserve
2. Group 1 projects shown in Table 2
3. Group 2 projects shown in Table 2
4. Group 3 projects shown in Table 2

The capacity within the currently programmed TE Reserve, \$2.583 million, plus the anticipated new TE capacity for Alameda County of \$2.629 million, plus additional TE funds made available through an ARRA/TE programming payback of \$257,000 equals \$5.469 million of TE programming capacity in the 2010 STIP. The project requests shown in Group 2 total \$8.016 million. Programming all of the Group 2 projects will result in oversubscribing by \$2.547 million.

Typically the new capacity in the STIP is made available in the two years added to the STIP horizon, i.e. FY's 13/14 and 14/15 for the 2010 STIP, but MTC has indicated that a change to TE funding may be pending. The pending change could impact the availability of TE funding in the later years of the 2010 STIP, so the Draft Alameda County 2010 STIP Proposal reflects a "front-loading" of TE programming. There have also been indications that some TE capacity will be made available during the second half of the current fiscal year, 2009/10, after the January budget numbers are released. Sponsors with any project(s) that can be ready for programming and allocation during the current fiscal year should highlight any such project(s).

Attachment C

Draft Principles for the Development 2010 STIP Project List

- The CMA's approach to the development of the 2010 STIP project list will focus on evaluation of projects currently programmed in the STIP.
- The CMA's commitments of future STIP programming, as memorialized in Resolutions 08-006 Revised (Caldecott Tunnel project) and 08-018 (Previous STIP commitment and MTC Reso 3434 projects), will be accounted for in the development of the 2010 STIP project list.
- All sponsors will be required to provide the CMA with updated cost, scope and schedule information for currently programmed projects.
- It is anticipated that any new funding programmed in the 2010 STIP will be made available in FY's 13/14 and 14/15.
- Any project submitted for funding must be consistent with the Countywide Transportation Plan and be able to meet all STIP requirements.
- Priority for new funding is proposed for components of projects that are currently programmed in the STIP and projects that have received a commitment of future STIP programming as memorialized in Resolutions 08-006 Revised and 08-018.
- Projects recommended for STIP programming must be shown to be ready to meet applicable programming, allocation and delivery deadlines associated with STIP programming.
- The following criteria are proposed for prioritization required for the development of the 2010 STIP project list:
 - ◆ Highest priority to projects that are currently programmed in the STIP and projects that have received a commitment of future STIP programming as memorialized in Resolutions 08-006 Revised and 08-018 that meet applicable project readiness standards.
 - ◆ For the remaining projects, strike a balance between funding for construction and project development, considering the following aspects of project delivery:
 - √ How far along is project development? – Highest priority to projects that are closest to capital expenditure, i.e. construction or right of way
 - √ Does the project have a full funding plan? Has funding been identified for future phases? What is the level of certainty of the availability of the project funding?
 - √ Can the project be phased?
 - √ Are there special considerations or timing constraints such as the need to preserve right of way or matching other funds?
 - √ Priority consistent with CMA Board identified priority projects
 - √ Equity (geographic, sponsor, modal)
 - √ Climate change impact
